

### **Community consultation**

Council has been conducting community consultation on several issues and this has been done through 'Your Say' and other more active methods such as surveys. Many in the community feel that even though the consultation is conducted, the input from it is not considered since many decisions made more recently by the Council seem to be at odds with community wishes.

If elected, what would you do to ensure that the community consultation conducted by Council had more influence on decision making?

### **Climate Change**

Every year we are seeing increasingly devastating impacts of climate change across Australia and the world. Many councils have declared a "climate emergency", along with delivery of Climate Emergency Plans which include actions such as 100 percent renewable energy, zero net emissions, divesting finances and pledges to lobby state and federal politicians for stronger action.

What are your views on this and in your role as councillor what sort of actions would you support to mitigate or adapt to climate change?

### **Public Land**

In the last 10 years we have seen proposals put forward or invited by Council for the building of private developments on public land (such as Arm End, Kangaroo Bay, Rosny Hill). These proposals have been controversial suggesting that they will have significant impacts on community.

If you were elected and you received evidence of significant community opposition to a proposed development on public land under Councils control, how would you act on it?

### **Urban Growth**

In the last ten years, the Census shows that the population of Clarence has increased by almost 10,000 people, and there has been a corresponding increase in dwellings of 3,500. With new suburbs still being developed, further growth is underway.

What challenges and opportunities do you think this level of growth presents to Council?

### **Ferry service**

The new ferry service between Hobart and Bellerive is anticipated to continue. The current patronage of the service is already putting pressure on the parking around Bellerive, and this will only increase if the service grows.

Do you support the service and, if you do, what would you do to address the parking pressures especially if the service was to be expanded in the future?

### **Your key issues**

What new initiatives are you eager to champion if you are elected and why do you see these as important to the future of the Clarence community?
